CAPABILITIES

Buildicy Capability Deck

A concise overview of the capabilities and technologies represented across Buildicy's project portfolio.

AI • AUTOMATION • SOFTWARE • DIGITAL PRODUCTS

Prepared for prospective Buildicy clients.

01 / THE BUILDICY CAPABILITY MAP

The Buildicy capability map

A compact technical and product view of the areas represented by our portfolio.

Capability layers

→ SaaS → Automation → Mobile → FinTech → Blockchain →

AI & SaaS

AI assistance, CRM intelligence, marketing automation, business insights and scalable SaaS workflows.

Automation & APIs

Automated processes, follow-ups, integrations, data movement, reporting and operational dashboards.

Web Applications

React and Next.js experiences, business platforms, portals, dashboards and API-connected applications.

Mobile

React Native and Android experiences for service discovery, booking, payment, chat and operational workflows.

FinTech & Payments

Multi-currency infrastructure, wallets, stablecoins, KYC workflows, banking infrastructure and settlement.

Blockchain & Web3

Solidity, Ethereum, wallets, IPFS, smart contracts, credentials, voting and tokenized assets.

Data & AI Operations

Python, APIs, databases, transformation, validation, reporting and intelligent automation.

Community & Events

Registration, challenges, teams, submissions, project management and innovation showcases.

Technology represented in the portfolio

Frontend

React • Next.js

Backend

Node.js • APIs

Mobile

React Native • Android

Languages

TypeScript • Python • Solidity

Blockchain

Ethereum • Ethers.js • Web3.js • IPFS • MetaMask

Data

Databases • Database APIs • Supabase

Automation

AI • APIs • Workflow automation

Payments

Payment integrations • UPI • Stablecoins • Blockchain APIs

Architecture mindset

> **“Choose the architecture around the product. Keep systems modular where provider flexibility, integrations or future scale matter.”**

A portfolio built across domains

The projects demonstrate breadth across AI, SaaS, marketing automation, CRM, fintech, payments, mobile marketplaces, blockchain, Web3, logistics, safety, data automation and technology communities.
